

Activity 5: Design a Total-Reward Job Offer Negotiation

Course TGS-2023020567 · K1 · K2 · K3 · A1 · A3

Objective

Prepare a multi-issue employment offer negotiation using priorities, alternatives, evidence and ethical information boundaries.

Real-world use-case basis

Real-world use case: job offers are negotiated across salary, bonus, equity, flexibility, role scope, development and start date. Personal information must be handled lawfully and respectfully.

Scenario

A Singapore software firm has selected a candidate for a regional operations role. The candidate's expected salary is above the original band, but they also value remote work, professional development and an earlier title review. The firm urgently needs a start within six weeks and must preserve internal equity.

Primary source

<https://sg.indeed.com/career-advice/career-development/negotiation-skills>

Training assumptions

- Approved base salary band is SGD 9,500–10,500 monthly.
- A sign-on award up to SGD 8,000 and training budget up to SGD 6,000 are available.
- The candidate's alternative offer is not verified and should not be treated as fact.
- The employer may offer two remote days weekly after a three-month onboarding period.

Questions

1. What are the employer's target, reservation point and non-financial priorities?
2. Which candidate interests should be tested rather than assumed?
3. How can three packages create choice while protecting internal equity?
4. Which candidate information is relevant, confidential or inappropriate to request?

Expected output

Three authorised total-reward packages with rationale, limits and questions.

Acceptance test

All packages remain inside authority, address at least four issues, state objective criteria and avoid discriminatory or intrusive assumptions.
